TOTAL CONFIDENCE WARRANTY

SOLARZONE[™]
HEAT AND UV CONTROL
WINDOW FILM

Your HanitaTek Total Confidence Warranty

HanitaTek SolarZone™ films are designed to keep you comfortable—and our warranty is designed to make you feel comfortable about window film installation.

HOW DO I ACTIVATE MY WARRANTY?

When installation is complete, your dealer will fill out a HanitaTek warranty form, give you a copy and send a copy to our headquarters. Keep your copy for your records; it validates your warranty in the event of a claim.

WHAT DOES THE WARRANTY COVER?

1. SolarZone Film

HanitaTek's commitment to quality includes a twelve year limited warranty on commercial window films. This protects you against cracking, changing color, crazing, delaminating, adhesive failure—the film will look great for a very long time.

2. Seal Failure

Insulated glass units, made of double-paned glass separated by a gas space, are sealed to prevent water vapor from entering the gas space. Seal failure of insulated glass units without window film is common and leads to a murky or cloudy appearance. It's often blamed on film application, though there is no evidence to support this claim.

To give you the greatest peace of mind, Hanita Coatings offers our own warranty against seal failure. If you have a valid window seal failure warranty at the time of film installation, Hanita Coatings will insure the window against seal failure for three years after film application.

3. Glass Breakage

The application of window film can create additional thermal stress on glass windows. With the purchase of SolarZone films, Hanita Coatings includes Five Year warranty coverage in the event of thermal shock related glass breakage. You can receive up to \$500 toward replacement of the window. This warranty covers only the glass and film combinations shown as acceptable in our film to glass chart in effect at the time of film installation. See the warranty form for details.

HOW DO I MAKE A WARRANTY CLAIM?

If you experience a problem with your film covered windows, contact your installer immediately. If you can't contact the installer, call HanitaTek directly at **(800) 660 5559**.
