

ONE CLEAR

SOLAR SOLUTIONS

Ask NGS about our free energy modelling services to see whether or not your building can achieve a 2 - 4 year ROI with a solar film application.

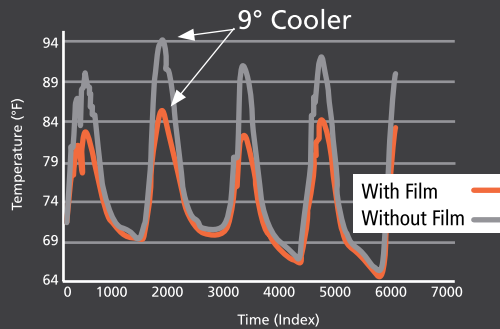

SOLAR ADVANGAGES:

- Achieve potential 3-year ROI
- Eliminate building hotspots for occupant comfort
- Protect merchandise, furniture and art
- Achieve LEED credits
- Improve building aesthetics
- Measure and verify performance

TEMPERATURE CONTROL

The graph shows a four day temperature logging experiment conducted on an office building.

NATIONAL SOLAR INSTALLATION THE NGS ADVANTAGE

As a nationally certified YGreene energy contractor with an Energy Pro building simulation certification, NGS works directly with building engineers and utility companies to confirm our solar film's performance. Our certified energy modellers run sophisticated software-eQuest (DOE2 simulation engine) and EFILM (DOE energy Plus simulation engine) - to analyze energy consumption with as little as a 10% margin of error. This capability plus state-of-the-art measurement and verification programs make NGS the nation's preeminent leader in the solar window film space.

- Energy modelling, measurement, and verification
- Financing options
- Installation & project management

CHOICE

"NGS provides responsive action to high demand projects. I have coordinated with NGS on many projects, some that require turnkey production then immediate installation. NGS successfully handles my projects, both large and small. NGS is a preferred partner due to their service and ability to complete projects quickly."
