WALLS, WINDOWS & MORE

**FILMS
AND GRAPHICS™**

These days, it's not enough to treat your store as a place where you work – you have to treat your store as a part of your workforce. If you're still coping with colorless cash wraps and wearisome walls, you're missing out. In fact, those blank, boring surfaces have upped their skillset; they've become skilled marketers with the power to grab people's attention—night and day, 365 days a year—and they're also accountants that save you money on energy costs, as well as security guards that protect your store from thieves. It's time you hired them.

NEXT GENERATION ENERGY FILMS

Keeping customers comfortable in store increases sales, but the heating and cooling costs it takes to create that comfort adds a hefty amount to your monthly bills. Energy-efficient films convert your large windows from a cash drain to a savings increase – you may even qualify for no-interest financing on your project.

SMART GLASS

You have a smart phone and a smart home—and you're a smart person—so why not feature flexible, energy-efficient smart glass in your store? Offering the high-tech atmosphere customers crave, smart glass transforms from transparent to opaque at the touch of a switch, and it displays video too. It's not just smart; it's genius.

DAYLIGHT REDIRECTING FILMS

In-store merchandise can lose its value quickly through fading, cracking, and peeling. That's because most window films don't block the spectrum of visible and non-visible light – they only block UV. Maintain your merchandise investment for years with a bright idea: daylight redirecting films.

WINDOW GRAPHICS

These days, it literally pays to stand out. The physical retail world must compete with online-ordering convenience, but shoppers agree there's something irresistible about walking in a store to touch their intended purchases. Get customers in your door—and make an impression that sticks—with stunning custom window graphics.

SECURITY

When you're ready for the highest levels of protection, you're ready for TRI-SHIELD. This innovative, triple-layered window film, invented by NGS, saves your merchandise from thieves, bombs, and storms, and meets government security standards. It's a breakthrough they can't break through.

ARCHITECTURAL WRAP INTERIOR & EXTERIOR

Deliver delight in every detail of the shopping experience when you update dull cash wraps and reinvent your store's interior and exterior using durable, gorgeous architectural wraps that simulate natural materials like stone, wood, metal, or leather.

ANTI GRAFFITI

Though it takes hours of time for shops to install and decorate a beautiful display window, it only takes seconds for a vandal to destroy that window with unsightly graffiti, scratching, or acid etching. Luckily, innovative anti-graffiti window films are easy to remove and replace, so your windows look great again in minutes.

WALL MURALS & FLOOR GRAPHICS

From seasonal promotions to year-round displays, bright, custom graphics make your brand and products stand out, even in the most unexpected of places. Whether you're looking for turnkey services from design to installation, or you're looking to print and install a custom graphic using a specific film brand, the NGS team has you covered.

HARD-WORKING SURFACES: IT'S NOT IMPOSSIBLE, IT'S INNOVATION.

Get innovation that sticks from NGS, the industry leader for attractive, energy efficient, secure films and graphics with turnkey solutions that transform your store's interior and exterior into your hardest working asset ever. Let's get those surfaces working for you.
